Therapy For Every Body

BENEFITS of MTS-7.1

- Temporary relief of minor muscle and joint pain
- Promoting the relaxation of muscle tissue
- Temporarily increasing local blood circulation
- Symptomatic relief and management of chronic intractable pain
- Adjunctive relief of post-surgical or post-traumatic acute pain

5 THERAPIES 7 MODALITIES

MTS 7.1 offers a customizable, **SIMULTANEOUS** combination of 5 therapies in 7 modalities to promote healing, decrease downtime, and manage pain.

TENS: E-Stim/Microcurrent

Transcutaneous electrical nerve stimulation (TENS) is a non-invasive modality applied to the surface of the skin that use electrical stimulation (E-stim) to activate underlying nerves. It provides symptomatic relief of acute pain.

LED Red Light

LED red light increases the energy inside cells that speeds up healing in both soft and deep tissue, and creates a soothing, pain-relieving effect.

LED Infrared Light

LED infrared light therapy uses a low-level laser light from below the red spectrum. It couples the positive effects of red light with the added benefits of heat to help heal deep tissue and speed recovery.

Vibratory Massage

Five levels of vibratory massage therapy increase blood flow and oxygen to the area which helps reduce muscle soreness and encourages the removal of cellular waste.

Pulsed Magnetic Therapy

Low-frequency pulsed electromagnetic fields (PEMF) encourage healthy cell function, increase blood flow, and may reduce osteoarthritic pain.

TESTIMONIALS

Read what veterinarians, trainers, and animal chiropractors are saying about MTS-7.1:

"A woman with a 25-year-old quarter horse was referred to me for lameness. The Vet said there was no cure and that the horse was going to be lame forever. One treatment with the MTS-7.1 and the horse was walking like he was 10 years old."

-Dave Barton, D.C.
Equine Chiropractor and Therapist

"I have been using the MTS-7.1 on the following conditions with very positive results:

- Tendon Inflammation
- Post Surgery Swelling
- Back Soreness
- Wounds
- Knee Injuries (hygromas)
- Splints - acute..."
- [and more!]

-Rhonda Rathgeber, PhD, DVM.
Hagyard Equine Medical Institute

"I have been using MTS-7.1 on several horses, specifically, a 2-year-old named Mommy's Star. She developed some swelling in her right tendon, so I immediately started using the MTS-7.1. In a few days the tendon looked normal. Mommy's Star broke her maiden for \$25,000 by 8 lengths!"

-Rosemary H. Trainer,
Calder Race Track
